Professional Summary

Unreal Engine Developer with a professional background in 3D content creation and interactive applications. Experienced in Unreal Engine 5 and Blueprint Visual Scripting with a strong foundation in gameplay prototyping, asset integration, optimization, and real-time rendering. Currently building Unreal Engine projects focused on gameplay systems and product visualization while leveraging 4.5+ years of experience delivering real-time 3D assets, VR environments, and interactive educational content. Strong understanding of game production pipelines, performance optimization, and collaborative development workflows.

Technical Skills

Game Development: Unreal Engine 5, Blueprint Visual Scripting, Gameplay Prototyping, Game Systems Development, Asset Integration, Level Design, Real-Time Rendering, Lighting, Optimization, Collision Setup, Interactive Experiences, Debugging and Testing.

Programming & Scripting: Gameplay Logic, Event-Driven Systems, State Management, Debugging, Reusable Blueprint Systems.

Game Engines: Unreal Engine 5 (Blueprint Visual Scripting, Gameplay Systems, Product Visualization, Cinematics, Real-Time Rendering), Unity (Scene Assembly, Asset Integration, Terrain Tools, Animator, UI Integration).

3D Development: 3D Modeling, Game-Ready Asset Creation, Modular Environment Design, Hard Surface Modeling, Organic Modeling, Low-Poly Modeling, High-Poly Sculpting, Prop Creation, Environment Art, Asset Optimization, Clean Topology.

Texturing & Materials: UV Mapping, Retopology, PBR Texturing, Material Creation, Texture Baking (Normal, AO), Substance 3D Painter.

Rigging & Animation: Character Rigging, Facial Rigging, Animation Fundamentals.

Software: Autodesk Maya, Blender, ZBrush, Substance 3D Painter, Unreal Engine 5, Unity, 3ds Max, AutoCAD, Arnold Renderer.

Experience

PERCEIVED DESIGN

Nov 2021 – May 2025

3D Artist

Bangalore, India

- Developed over 150 production-ready 3D assets and animations for interactive educational applications using Maya, Blender, ZBrush, Substance Painter, and Unity-based workflows.
- Created and optimized real-time environments and assets for VR experiences, focusing on performance, scalability, and user interaction.
- Designed and integrated more than 300 optimized assets with efficient topology, UV layouts, and materials suitable for real-time applications.
- Collaborated with multidisciplinary teams across 40+ projects to deliver interactive content aligned with project requirements and technical constraints.
- Utilized Unity for scene assembly, asset validation, terrain workflows, animator setup, and UI integration to support interactive experiences.
- Applied optimization techniques to improve runtime performance across multiple interactive environments.

EMNAS Technologies Pvt. Ltd.

Jul 2018 – Jul 2021

3D Visualizer and CAD Designer

Chennai, India

- Produced over 500 detailed AutoCAD drawings for kitchen countertops with CNC-ready precision, reducing manufacturing errors by 40%.
- Designed and rendered realistic interior visualizations for over 100 client projects using 3ds Max, improving client communication and reducing design revisions.
- Self-learned 3ds Max and rapidly applied it to production projects, contributing to over 20 successful client acquisitions through high-quality visual presentations.
- Collaborated with cross-functional teams to align technical requirements with creative goals, streamlining workflows and reducing design-to-production time.
- Delivered high-quality visualizations and technical documentation that accelerated decision-making and shortened project cycles by 15%.

Education

KGiSL Institute of Technology

August 2014 – May 2018

Bachelor of Engineering in Mechanical Engineering

GPA: 6.5

Certifications

- Certified Maya Professional

Personal Projects

Unreal Engine 5 Projects – Gameplay Prototyping & Interactive Experiences

- Developing gameplay prototypes and interactive experiences using Unreal Engine 5 and Blueprint Visual Scripting.
- Designing and implementing gameplay mechanics, interactions, and reusable Blueprint systems.
- Building real-time environments with a focus on lighting, materials, optimization, and performance.
- Creating cinematic sequences and presentation experiences using Unreal Engine rendering workflows.
- Exploring game architecture, debugging techniques, and optimization strategies for scalable gameplay systems.
- Leveraging AI-assisted workflows for Blueprint development, rapid prototyping, and technical problem-solving.
